

Professional online study

YOU can achieve plenty in a year, but with Open Universities Australia's new Open2Study education venture, you can achieve more than ever before in just four weeks.

Open2Study is a free, online tertiary and professional learning platform, offering a range of courses tailored specifically for online learners.

Paul Wappett, OUA CEO, said available subjects were based on student demand, ranging from financial planning to nursing and are completed in only four weeks.

"Subjects are taught by academics and leading industry professionals from institutions including Macquarie University, RMIT University and the Central Institute of Technology," Mr Wappett said. "Anyone can

jump online and enrol today – it takes less than 30 seconds.

"Our students won't pay a cent – there are no hidden costs for textbooks, student admin or exams. Everything they need to pass will be provided at no cost," Mr Wappett said.

"There's a lot of free stuff available on the internet, but that doesn't mean that it's any good. We're focused on delivering outstanding quality, but without the price tag."

Open2Study's classroom environment ensures that learning occurs in one place, encouraging students to collaborate and support each other, while engaging with videos and subject matter.
